

U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
Registration Division (7505P)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

EPA Reg. Number:

91234-261

Date of Issuance:

9/30/22

NOTICE OF PESTICIDE:

Registration
 Reregistration
(under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

A197.02A

Name and Address of Registrant (include ZIP Code):

Beth Anderson
Atticus, LLC
5000 CentreGreen Way, Suite 100
Cary, NC 27513

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

Signature of Approving Official:

Tamica Cain, Product Manager 10
Invertebrate & Vertebrate Branch 2
Registration Division (7505T)

Date:

9/30/22

2. You are required to comply with the data requirements described in the DCI identified below:
 - a. Indoxacarb GDCI-067710-1382

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI listed above, you may contact the Chemical Review Manager in the Pesticide Reevaluation Division: <http://iaspub.epa.gov/apex/pesticides/f?p=chemicalsearch:1>

3. The data requirements for storage stability and corrosion characteristics (Guidelines 830.6317 and 830.6320) are not satisfied. You have 18 months from the date of registration to provide these data.
4. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 08/06/2021
- Alternate #1 CSF dated 08/06/2021

If you have any questions, please contact David Gardner by phone at (202) 566-2677, or via email at gardner.david@epa.gov.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

All handlers must wear long-sleeved shirts, long pants, shoes, and socks.

Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 24 hours. Rinsing application equipment over the treated area will help avoid runoff to water bodies or drainage systems. Do not apply to any impervious surfaces which may contact or lead directly to surface water, storm drains, or urban runoff conveyance systems (gutters).

{SUB-LABEL A: COMMERCIAL USE LANGUAGE}

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

READ ALL DIRECTIONS COMPLETELY BEFORE USE.

A197.02a is applied as a crack and crevice or spot treatment to indoor or outdoor sites where ant infestations are a problem.

Kills ants* in and around residential, institutional, commercial and industrial areas. These sites include inside residential buildings (including apartments and single and multi-family buildings), commercial and industrial facilities (including warehouses, supermarkets, restaurants, motels, hotels, hospitals & nursing facilities, zoos, food handling/storage establishments), schools, day care facilities, transportation equipment (including aircraft, trains, ships, boats, cars, trucks, semi trucks, and buses) and other similar sites where ant infestations or activity can be problematic.

*Except Pharoah ants

A197.02a is specifically formulated to be attractive to all* major pest species of ants. This product kills ants* such as Acrobat, Argentine, Big-Headed, Carpenter, Cornfield, Crazy, Field, Ghost, Honey, Little Black, Odorous House, Pavement, Pyramid, Red Imported Fire Ant, Rover, Thief and Whitefooted. For complete control of outdoor nests of Harvester and Red Imported Fire Ants, use additional treatments labeled for outdoor management of these pest species.

*Except Pharoah

USE RESTRICTIONS:

- **DO NOT** treat areas that are easily accessible to children, domestic animals and pets.

- **DO NOT** apply to surfaces that food contacts.
- **DO NOT** allow open foods to contact gel material.

USE PRECAUTIONS:

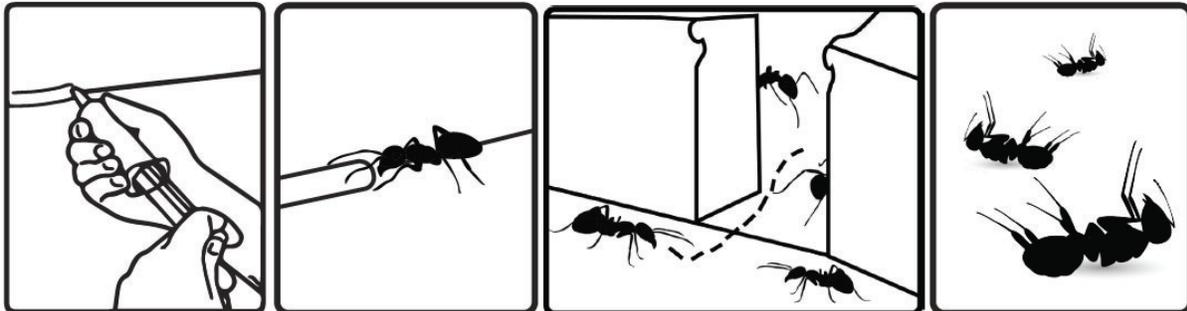

- Avoid applying **A197.02a** to surfaces recently treated with repellent residual sprays.
- **DO NOT** apply repellent residual sprays to surfaces treated with **A197.02a**.

APPLICATION INSTRUCTIONS AND USE RATES

- **A197.02a** may be applied as spots or small beads of gel.
- Spots or beads of gel should be applied to areas where ants are active, to foraging trails, or nest sites.
- For spot applications: apply 0.1 to 1.0 gram of **A197.02a** per spot. Spots should be approximately 1/4" in diameter. Make as many placements as necessary.
- For bead applications: apply **A197.02a** as a bead approximately 1/8" wide and 2" long; for highly active foraging trails, extend the bead up to 3".
- When making applications of gel, avoiding disrupting the natural foraging of ants.
- If the ant nest can be located, inject up to 2.0 grams of bait directly into the nest or harborage entrance. [*]
- For applications into commercially available refillable bait stations, apply only an appropriate amount of **A197.02a** so the bait does not spill from the station and the station is not over-filled.
- After application, inspect bait placements for consumption/activity. If needed, apply additional **A197.02a** and reapply bait in the same location if all the bait is consumed or in a different area if new ant activity is observed.

[*Not for Use in California]

[HOW IT WORKS

1. Apply to cracks and crevices.

2. Ants eat the gel bait.

3. Then return to the nest to die.

4. Ants die in 24 hours.

]

[WHERE IT WORKS

INDOOR APPLICATION DIRECTIONS

- Carefully inspect infested areas to determine infestation levels, where ants are foraging, nesting sites, and specific areas where bait should be applied.
- Bait should be applied indoors into cracks and crevices along walls, ceilings or floors, cabinets, behind or under equipment or appliances, under tables, within framing of tables or furniture, around sinks, within or near garbage collection areas, attics, or other inaccessible areas indoors.
- Bait applications may also be made between elements of construction, behind baseboards or molding, at openings into voids, and within hollow spaces in equipment bases and legs, near sinks or stoves, and in bathrooms.
- If using refillable bait stations, place the stations where ants are foraging or near their trails or nests. Inspect gel placements regularly and replace gel with fresh gel as needed.

APPLICATIONS IN FOOD/FEED HANDLING AREAS

Apply **A197.02a** only as a crack and crevice application to food/feed areas of food/feed handling establishments. Applications may be made while the facility is in operation. Place the bait dispenser directly into the crack or crevice, hole or other similar opening where ants are found or suspected and dispense bait. Food and feed handling areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food/feed area when food is exposed, and facility is in operation. Use good application practice to avoid movement of **A197.02a** to exposed surfaces used for food preparation.

Food/Feed Handling Use Restrictions:

- **DO NOT** apply **A197.02a** to areas where food/feed, food utensils or food processing surfaces may come into contact and become contaminated.
- **DO NOT** apply **A197.02a** to areas that are routinely washed such as cracks and crevices in tops of tables, food/feed preparation and prepared food holding surfaces as bait could be removed by the washing.
- **DO NOT** apply **A197.02a** to surfaces where the temperature exceeds 120 - 130°F because this could cause the bait to liquefy and lose effectiveness.
 - Examples include, but are not limited to, heat producing equipment, parts of stoves, ovens, grills, fume hoods, saunas, heat lamps, coffee urns, steam tables, toasters, fryers, dishwashers, and hot water pipes.

If **A197.02a** contacts an exposed surface, first remove as much of the gel bait as possible, then wash area with soap and water.

APPLICATIONS IN NON-FOOD/NON-FEED HANDLING AREAS

A197.02a can be used as a spot or crack and crevice treatment in areas inaccessible to children and pets to control ants in residential structures and the non-food/non-feed areas of commercial, industrial, public and institutional buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, laboratories, computer facilities, aircraft, buses, boats/ships, trains, pet shops and zoos.

Non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after bottling or canning).

[WAX PAPER APPLICATION

For gel bait applications under appliances and other similar areas, or to protect the bait from possible existing contamination, apply the bait using 2" - 3" wax paper squares. Fold the wax paper in half to make a triangle and apply the 1/8" wide and 2" long bait bead in the center. Place the folded wax paper containing the bait into the appropriate bait placement location. Wax paper squares can easily be inspected, removed and/or replaced as needed.]

OUTDOOR APPLICATION DIRECTIONS

- Thoroughly inspect around structures for entry points, openings, and other similar areas where ants can access and crawl in.
- If access points are identified, make effort to remove or patch to prevent entry into structure.
- Apply spots or beads of **A197.02a** (see application rates for all uses) to windows, doors, between construction elements, sewer areas, adjacent ant harborage (trees, ornamental plants), along walls, garbage holding areas, or other suitable placement sites.
- Apply **A197.02a** to suitable areas to reduce the potential of subsequent human contact.
- After application, inspect bait placements for consumption/activity and apply fresh ant gel as needed.
- If outdoor temperatures are high, the consistency of the gel may be affected. Inspect placements after application to determine if additional gel is needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Keep this product in its tightly closed original container. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals, in such a manner as to prevent cross contamination with other pesticides, fertilizers, food and feed.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: DO NOT reuse or refill this container. Offer to recycling if available. Place empty bait dispensers in trash. If partially filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

LIMITATION OF WARRANTY AND LIABILITY

IMPORTANT: READ BEFORE USE. Read the entire Directions for Use, Conditions of Warranties and Limitations of Liability before using this product. If these terms and conditions are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Disclaimer of Warranties and Limitations of Liability. **CONDITIONS:** The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Ineffectiveness, injury, and other unintended consequences may result because of such factors as manner of use or application (including misuse), the presence of other materials, weather conditions, and other unknown factors, all of which are beyond the control of ATTICUS, LLC. To the extent consistent with applicable law, all such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: To the extent consistent with applicable law, ATTICUS, LLC makes no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond statements on this label. **LIMITATIONS OF LIABILITY:** To the extent consistent with applicable law, neither ATTICUS, LLC the manufacturer, nor the Seller shall be liable for any indirect, special, incidental or consequential damages resulting from the use, handling, application, storage, or disposal of this product. To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use, handling, application, or storage of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid.

{SUB-LABEL B: CONSUMER USES}

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

READ ALL DIRECTIONS COMPLETELY BEFORE USE.

This product will kill ant pests* including Acrobat, Argentine, Big-Headed, Carpenter, Cornfield, Crazy, Field, Ghost, Honey, Little Black, Odorous House, Pavement, Pyramid, Red Imported Fire Ant, Rover, Thief and White-footed ants. (*Except Pharaoh ants)

USE RESTRICTIONS:

- **DO NOT** treat areas that are easily accessible to children, domestic animals and pets.
- **DO NOT** apply to surfaces that food contacts.
- **DO NOT** allow open foods to contact gel material.

USE PRECAUTIONS: Avoid applying **A197.02a** to surfaces recently treated with repellent residual sprays. Surfaces treated with **A197.02a** should not be treated with repellent residual sprays.

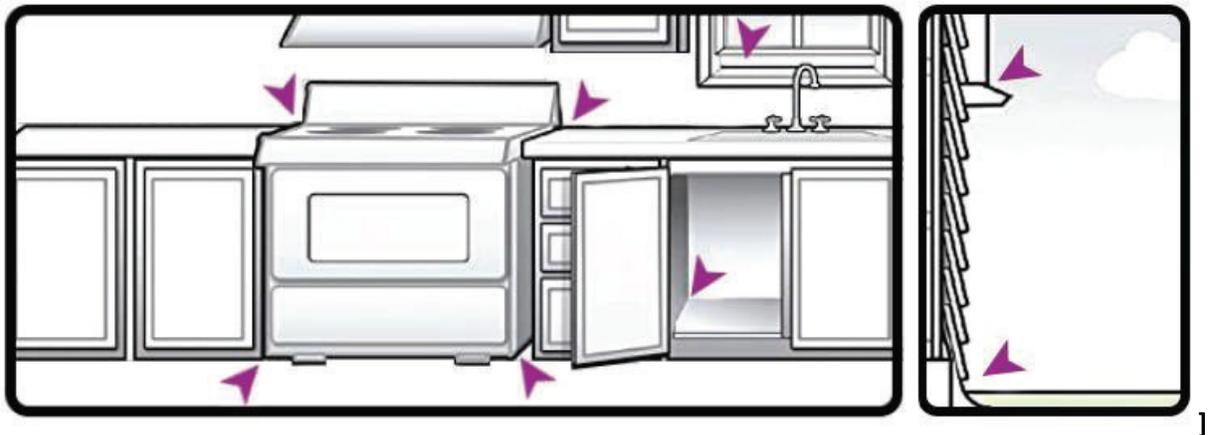

WHERE TO APPLY:

Indoor and outdoor uses in residential sites including houses, apartments, boats, cars, trucks, sheds, garages and RVs.

For food/feed handling areas such as kitchens, apply as crack and crevice treatments along walls, baseboards or floors, behind or under appliances (such as refrigerators, dishwashers and stoves), under tables, around window frames, within framing of tables or furniture, around sinks, within or near garbage collection areas, attics, crawl spaces, and cracks and crevices in cabinets.

For areas other than kitchens (non-food/non-feed handling areas), apply as spot or crack and crevice treatments.

[WHERE IT WORKS

HOW TO USE:

Remove cap from the tip of the bait dispenser [tube]. [Place plunger into rear of tube.] [Use with provided plunger] [or in conjunction with a gel gun.] [Insert tube into gel gun.] Place tip where gel bait is to be applied and [depress plunger/pull trigger]. Apply gel in pea sized droplets (approximately 1/4" in diameter) or in 2" lines. See figures below for size examples. Apply as many placements of **A197.02a** as possible to active ant areas without disrupting the natural foraging behavior of ants. The amount of bait required for effective control will depend on the severity of the ant infestation. Inspect gel regularly and replace as needed. Replace cap on gel tip when finished dispensing gel. Use a paper towel to remove unwanted bait placements and then discard in trash. Inspect applications periodically for consumption/activity and apply fresh bait placements as needed. Reapply bait in the same location if the bait is all gone or in a different area if new ant activity is evident.

Figure 1. Example line of gel approximately 1/8" x 2".

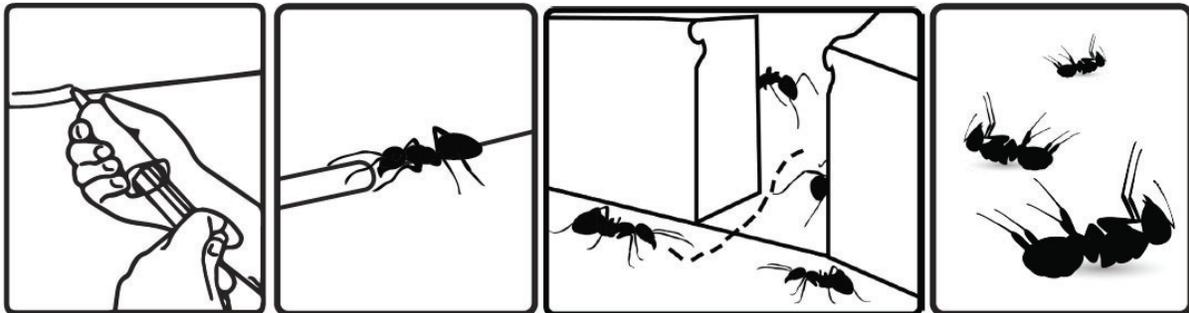

Figure 2. Spot of gel approximately 0.1 g of gel bait.

Figure 3. Example spot of gel approximately 1 g of gel bait.

Bait is still attractive when dry, however, it is best to re-apply if continued ant activity is noticed. Ant activity may continue [for a period of time] and will be related to the level of infestation. Proper sanitation (removal of refuse/garbage/crumbs/food residues) will increase the effectiveness of **A197.02a**.

[HOW IT WORKS

1. Apply to cracks and crevices.

2. Ants eat the gel bait.

3. Then return to the nest to die.

4. Ants die in 24 hours.

]

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Keep this product in its tightly closed original container. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals, in such a manner as to prevent cross contamination with other pesticides, fertilizers, food and feed.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: DO NOT reuse or refill this container. Offer to recycling if available. Place empty bait dispensers in trash. **If partially filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

LIMITATION OF WARRANTY AND LIABILITY

IMPORTANT: READ BEFORE USE. Read the entire Directions for Use, Conditions of Warranties and Limitations of Liability before using this product.
